Clinical Director of Vision Therapy

"Where Vision Is More Than Just 20/20"

PATIENTS WITH AUTISM

1. Is your child hypersensitive to certain stimulus? Yes No
If yes, identify if the stimuli is auditory, visual or tactile... And what type of reaction results?

2. Are there any dysfunctional behaviors your child exhibits and how are they dealt with?

3. Name a few things your child enjoys...

4. Is your child interested in any particular activities or events?

5. What kinds of food or objects are used as positive reinforcement for your child?

6. Are there any special commands or phrases used to get your child to be compliant?
